

**APPLICATION**

This modification is available for Model SD and GSD standard door operators with 24V control circuits (M) and logic control board (L).

**FUNCTIONS**

Required on slide door operators where one operator is used to open two bi-parting doors, one sliding left and the other sliding right to open. Includes a modified second slider and a second door bracket mechanism. The operator is not effected. However, operator horsepower must be selected using the area (in square feet) of entire door opening.

**INSTALLATION INSTRUCTIONS**

Refer to the slide door instructions provided with the operator for operator mounting, electrical connections and operating instructions.

KIT PART #	DESCRIPTION
K75-10471	Trolley Slider Kit For Bi-Parting Doors
